# SOYA WAX INFORMATION SHEET

## Benefits of Golden Wax

- All Natural Waxes are easier to work with than traditional paraffin slabs.
- Golden Brands is first-rate in providing quality service and technical assistance.
- Golden Wax is nontoxic.
- Golden Wax is a completely natural and renewable resource.
- Golden Wax helps support the American farmer.
- Golden Wax is clean burning.
- Golden Wax produces measurably less soot than other waxes, when burned correctly Golden Wax is virtually soot free.
- Golden Wax works with standard candle making equipment that is readily available on the market today.
- Golden Wax candle spills clean up much easier than other wax spills; simply use soap and hot water to get the wax out of carpets or upholstery.
- More and more candle manufacturers are making the switch from paraffin slabs to vegetable wax flakes.

## Uses for Golden Wax

- All Natural Candles
- Lip Balms
- Lotions
- Soaps
- Pharmaceuticals
- Detergents and Detergency
- Vegetable Oils as Bio-diesel
- Vegetable Oils as Lubricants, Hydraulic Fluids and Inks
- Vegetable Oils in the Production of Polymers and Plastics
- Paints, Varnishes, and Related Products
- Soy Proteins as Edible Films and Adhesives

Golden Wax has two blended waxes that contain a soy-based additive and are both natural and kosher. This soy-based additive enables the soy to be poured at a hotter temperature reducing frosting and increasing FO load. These waxes blend well with paraffin, slack wax, and microcrystalline waxes.

Has a lower melt point which helps with the burn and gives better glass adhesion

**Pour Temp:** 125-145

**Melt Point:** 115-120

**FO Load:** 7%-9%
